Filed: September 17, 2003

Examiner: Unknown

For:

TACKY DUST CLEANER

INFORMATION DISCLOSURE STATEMENT UNDER 37 C.F.R. §§ 1.97 and 1.98

Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

Sir:

In accordance with the duty of disclosure under 37 C.F.R. § 1.56, Applicant hereby notifies the U.S. Patent and Trademark Office of the documents which are listed on the attached PTO/SB/08 A & B (modified) form and/or listed herein and which the Examiner may deem material to patentability of the claims of the above-identified application.

One copy of each of the listed documents is submitted herewith.

The present Information Disclosure Statement is being filed: (1) No later than three months from the application's filing date for an application other than a continued prosecution application (CPA) under §1.53(d); (2) Before the mailing date of the first Office Action on the merits (whichever is later); or (3) Before the mailing date of the first Office Action after filing a request for continued examination (RCE) under §1.114, and therefore, no Statement under 37 C.F.R. § 1.97(e) or fee under 37 C.F.R. § 1.17(p) is required.

In compliance with the concise explanation requirement under 37 C.F.R. § 1.98(a)(3) for foreign language documents, Applicant submits the following explanations:

Japanese Patent Laid-Open No.61 100224 (Sekisui Chemical Co., Ltd.) describes a cleaner using a tacky tape comprising a pressure-sensitive adhesive layer having been expanded. However, this specification neither describes nor suggests that the expanded pressure-sensitive adhesive layer comprises the specific acrylic polymer composition comprising the components (A) to (D) as described in the present invention.

Japanese Utility Model Registration No. 2530113 (Nitto Denko Corporation) describes a cleaner using a tacky tape comprising a pressure-sensitive adhesive layer having been expanded. However, this specification neither describes nor suggests that the expanded pressure sensitive adhesive layer comprises the specific acrylic polymer composition comprising the components (A) to (D) as described in the present invention.

Japanese Utility Model Registration No. 2539129 (Nitto Denko Corporation) describes a cleaner using a tacky tape comprising a pressure-sensitive adhesive layer having been expanded. However, this specification neither describes nor suggests that the expanded pressure-sensitive adhesive layer comprises the specific acrylic polymer composition comprising the components (A) to (D) as described in the present invention.

The submission of the listed documents is not intended as an admission that any such document constitutes prior art against the claims of the present application. Applicant does not waive any right to take any action that would be appropriate to antedate or otherwise remove any listed document as a competent reference against the claims of the present application.

INFORMATION DISCLOSURE STATEMENT
